S.S.C. Napoli only just failed to defend its inaugural Serie A title, finishing two points behind A.C. Milan.Napoli proved to be the most offensive team in the entire league, with Careca and Diego Maradona dominating the scoring charts. Due to Milan's strong defence that was not enough for the title, and due to a 3-2 defeat at home to the eventual champions, the title defence got out of reach.

"Coptic Monasteries takes the reader on a tour of the best preserved and most significant of Egypt's ancient religious centers, documenting the richness and the glory of this country's Coptic heritage." "An informative introduction by Tim Vivian brings to life the early Christian era, with background information on the origins of the Coptic Church as well as its rites and ceremonies, sketches of some of monasticism's founding figures, and accounts of some of the difficulties they faced, from religious schism to nomadic attacks." "Gawdat Gabra's expert commentary, complemented by almost one hundred full-color photographs of wall paintings and architectural features, covers monasteries from Aswan to Wadi al-Natrun. Ranging across a thousand years of history, Gabra's observations will make any reader an expert on the composition and content of some of Egypt's most outstanding religious art and the salient architectural features of each monastery, as well as the ongoing process of restoration that has returned much of their original vibrancy to some of these works."--Jacket.

A comprehensive treatment of the reflections by Augustan poets on Apollo as an imperial icon.

[Race] was essentially a construction of the 18th century, a means by which the Enlightenment could impose rational order on human variety. In this book, the art historian David Bindman argues that ideas of beauty were from the beginning inseparable from race, as Europeans judged the civility and aesthetic capacity of other races by their appearance. These judgements were combined with a conflict between those who wished to order humanity into separate races, and those who believed in a common humanity whose differences were due to climatic and geographical variations. Central to this debate was the work of Linnaeus and Buffon, but it was also driven by the writings of the German art historian J. J. Winckelmann, who argued for the supremacy of the ancient Greeks, the Swiss physiognomist J. C. Lavater, who believed that moral character could be deduced from the study of a person's face, and by two scientists | the father and son Reinhold and Georg Forster | who had been on Captain Cook's second voyage to the South Seas in 1772/5.During this time the philosopher Immanuel Kant attempted the first modern definition of race, a definition which was challenged by Georg Forster and the philosopher J. G. von Herder, sparking a lively but astonishingly little-known controversy that went on through the next decade and beyond. The 1770s also saw the beginnings of a more scientific yet also profoundly aesthetic approach to race in the work of Johann Friedrich Blumenbach and Pieter Camper, whose notorious classification of skulls was, despite their own liberalism, to become the basis of 19th-century [racial science].Ape to Apollo provides a refreshing and original view of a highly contentious subject. It will be essential reading for anyone seeking the origins of today's controversies over race and ideas of beauty.

An insightful look at the urban sensibility that gives the Great American Songbook its pizzazz.

The text was originally published with other illustrations in 1983 by Harry N. Abrams Inc. Here it is repackaged with reproductions of over 65 paintings by Francoise Gilot (the paintings were created independently—not expressly for the book). Neither the text nor the artwork are conventional explications of how the gods were understood by the Greeks, but rather, both writer and artist offer personal interpretations of each god's character, power, and meaning. Winner of the 2005 Harold Morton Landon Translation Award from the Academy of American Poets. In Works of Hesiod and the Homeric Hymns, highly acclaimed poet and translator Daryl Hine brings to life the words of Hesiod and the world of Archaic Greece. While most available versions of these early Greek writings are rendered in prose, Hine's illuminating translations represent these early classics as they originally appeared, in verse. Since prose was not invented as a literary medium until well after Hesiod's time, presenting these works as poems more closely approximates not only the mechanics but also the melody of the originals. This volume includes Hesiod's Works and Days and Theogony, two of the oldest non-Homeric poems to survive from antiquity. Works and Days is in part a farmer's almanac—filled with cautionary tales and advice for managing harvests and maintaining a good work ethic—and Theogony is the earliest comprehensive account of classical mythology—including the names and genealogies of the gods (and giants and monsters) of Olympus, the sea, and the underworld. Hine brings out Hesiod's unmistakable personality. Hesiod's tales of his escapades and his gritty and persuasive voice not only give us a sense of the author's own character but also offer up a rare glimpse of the everyday life of ordinary people in the eighth century BCE. In contrast, the Homeric Hymns are more distant in that they depict aristocratic life in a polished tone that reveals nothing of the narrators' personalities. These hymns (so named because they address the deities in short invocations at the beginning and end of each) are some of the earliest examples of epyllia, or short stories in the epic manner in Greek. This volume unites Hine's skillful translations of the Works of Hesiod and the Homeric Hymns—with Hine's rendering of the mock-Homeric epic The Battle of the Frogs and the Mice—in a stunning pairing of these masterful classics.

"Constantine was the first Roman emperor to convert to Christianity. The book explores the emperor's image as conveyed through literature, art, and architecture, and shows how Constantine reconciled the tradition of imperial divinity with his monotheistic faith. It demonstrates how the traditional themes and imagery of kingship were exploited to portray the emperor as the saviour of his people and to assimilate him to Christ. This is the first book to study simultaneously both archaeological and historical information to build a picture of the emperor's image and propaganda. It is extensively illustrated" --Provided by publisher.

Classical Greek architectural sculpture has never before been fully studied as a single topic.

Sculpture and the Museum is the first in-depth examination of the varying roles and meanings assigned to sculpture in museums and galleries during the modern period, from neo-classical to contemporary art practice. It considers a rich array of curatorial strategies and settings in order to examine the many reasons why sculpture has enjoyed a position of such considerable importance - and complexity - within the institutional framework of the museum and how changes to the museum have altered, in turn, the ways that we perceive the sculpture within it. In particular, the contributors consider the complex issue of how best to display sculpture across different periods and according to varying curatorial philosophies. Sculptors discussed include Canova, Rodin, Henry Moore, Flaxman and contemporary artists such as Rebecca Horn, Rachel Whiteread, Mark Dion and Olafur Eliasson, with a variety of museums in America, Canada and Europe presented as case studies. Underlying all of these discussions is a concern to chart the critical importance of the acquisition, placement and display of sculpture in museums and to explore the importance of sculptures as a forum for the expression of programmatic statements of power, prestige and the museum's own sense of itself in relation to its audiences and its broader institutional aspirations.
