A collection of essays by many of the closest co-workers of Raphael H\u00e8gh-Krohn.

This book is a printed edition of the Special Issue "Advances in SAR: Sensors, Methodologies, and Applications" that was published in Remote Sensing

This book constitutes the thoroughly refereed post-conference proceedings of the 7th International Conference on Numerical Methods and Applications, NMA 2010, held in Borovets, Bulgaria, in August 2010. The 60 revised full papers presented together with 3 invited papers were carefully reviewed and selected from numerous submissions for inclusion in this book. The papers are organized in topical sections on Monte Carlo and quasi-Monte Carlo methods, environmental modeling, grid computing and applications, metaheuristics for optimization problems, and modeling and simulation of electrochemical processes.

Microsoft Word is one of the most used applications in the Microsoft Office suite. This handy reference includes clear explanations, legal-specific descriptions, and time-saving tips for getting the most out of Microsoft Word and customizing it for the needs of today's legal professional. Focusing on the tools and features that are essential for lawyers in their practice, this book explains the key components to help make lawyers more effective, more efficient, and more successful.

Is your PC dragging? Does your broadband network creep along at dial-up speeds? Do Web pages take forever to load on your smartphone? Don't wait! If your gear has lost its pep, these fixes will get you back into the fast lane.-Supercharge your PC's hardware-Learn how to replace your graphics card-Upgrade your RAM-Adjust network card settings-Give your printer a speed boost

This book constitutes the refereed proceedings of the Second International Conference on Advanced Machine Learning Technologies and Applications, AMLTA 2014, held in Cairo, Egypt, in November 2014. The 49 full papers presented were carefully reviewed and selected from 101 initial submissions. The papers are organized in topical sections on machine learning in Arabic text recognition and assistive technology; recommendation systems for cloud services; machine learning in watermarking/authentication and virtual machines; features extraction and classification; rough/fuzzy sets and applications; fuzzy multi-criteria decision making; Web-based application and case-based reasoning construction; social networks and big data sets.

This publication deals with the application of advanced digital signal processing techniques and neural networks to various telecommunication problems. It consists of eight selected contributions to the European Project COST#229. The editor presents the latest research results in areas such as arrays, mobile channels, acoustic echo cancellation, speech coding and adaptive filtering in varying environments. He also gives an overview of new approaches to communication tasks by using new technologies. These include: image coding by means of fractals and neural networks and neural network channel equalisation. A deep insight is given into the present possibilities and research avenues in the area of information processing for communication applications. Digital Signal Processing in Telecommunications will be of particular interest to researchers and telecommunications professionals.

Proceedings of the NATO Advanced Study Institute, Funchal, Madeira, Portugal, August 6--19, 1993

More than 20 years have passed since the introduction of the Universal Character Set. However, legacy applications still sometimes cannot even render German umlauts correctly. Part of this problem is a hidden political agenda: Consciously or unconsciously, patterns of the Cold War are continued in the interaction between Western and Eastern European languages. This book examines the current use of diacritical marks in Western Europe, such as the use of names from Slavic languages in electronic data processing systems. The role of the media as multiplier receives particular attention, with most error examples taken from actual media coverage.Considering international, EU, and national law and referring to ground-breaking court decisions, Kappenberg answers the question: 'Is there a right to diacritical marks in people's names?' This is followed by a description of current practice in several European countries.Finally, Setting Signs for Europe answers the question how in the framework of the EU's multilingualism policy effective approaches can be created to raise awareness among software vendors, the media, government agencies, and individuals regarding the correct handling of diacritics. Kappenberg also assesses the use of diacritics as a style element and offers an improved input method for diacritics.

The second edition of this best-selling Python book (over 500,000 copies sold!) uses Python 3 to teach even the technically uninclined how to write programs that do in minutes what would take hours to do by hand. There is no prior programming experience required and the book is loved by liberal arts majors and geeks alike. If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In this fully revised second edition of the best-selling classic Automate the Boring Stuff with Python, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand--no prior programming experience required. You'll learn the basics of Python and explore Python's rich library of modules for performing specific tasks, like scraping data off websites, reading PDF and Word documents, and automating clicking and typing tasks. The second edition of this international fan favorite includes a brand-new chapter on input validation, as well as tutorials on automating Gmail and Google Sheets, plus tips on automatically updating CSV files. You'll learn how to create programs that effortlessly perform useful feats of automation to: • Search for text in a file or across multiple files • Create, update, move, and rename files and folders • Search the Web and download online content • Update and format data in Excel spreadsheets of any size • Split, merge, watermark, and encrypt PDFs • Send email responses and text notifications • Fill out online forms Step-by-step instructions walk you through each program, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in Automate the Boring Stuff with Python, 2nd Edition.
