developmental disorder, obsessive-compulsive disorder, asperger's syndrome, and autism, to name but a few, may be viewed as points on a spectrum of developmental disabilities in which those points share features in common and possibly etiology as well, varying only in severity and in the primary anatomical region of dysfunctional activity. is always asked one question: Why? Why are autism rates exploding? But an equally important question always follows: What can we do about it as a society—and what can I do to help my child? In this candid, research-based, practical book, Dr. Melillo presents the latest scientific explanation for how we got here and proven, drug-free strategies that parents can employ to help prevent, detect, and address the autism epidemic for themselves and their families. With honesty and compassion, Dr. Melillo explains what the latest scientific research tells us about the role of genetic, environmental, and lifestyle factors, dispelling myths and replacing them with the facts. In addition, he presents early warning signs, a prevention plan for parents-to-be, and an intervention program for babies and young children.
