While conventional similar books focus on medical science and social aspects, this book emphasizes computing science and engineering design. This feature can help with both industry development and academic research. It book explains in detail both entire telehealthcare engineering system and individual hardware components. For example, it has circuit design details on ECG /EEG sensors. Highlighting basic principles and deep research development (R&D) details, the book focuses on two important design aspects: medical sensor design and medical signal processing. Their principles can be directly used for practical product design.

Pite Saami is a highly endangered Western Saami language in the Uralic language family currently spoken by a few individuals in Swedish Lapland. This grammar is the first extensive book-length treatment of a Saami language written in English. While focussing on the morphophonology of the main word classes nouns, adjectives and verbs, it also deals with other linguistic structures such as prosody, phonology, phrase types and clauses. Furthermore, it provides an introduction to the language and its speakers, and an outline of a preliminary Pite Saami orthography. An extensive annotated spoken-language corpus collected over the course of five years forms the empirical foundation for this description, and each example includes a specific reference to the corpus in order to facilitate verification of claims made on the data. Descriptions are presented for a general linguistics audience and without attempting to support a specific theoretical approach, but this book should be equally useful for scholars of Uralic linguistics, typologists, and even learners of Pite Saami.

This is the most up-to-date and complete book you will find on producing. It covers the new CUE process from BMI and ASCAP for getting paid for soundtrack music. It includes a buyer's guide for covering Netflix Approved cameras. It covers the essentials and introduces you to the process. It can take a person who knows nothing about film & video production, leading them from story, to script, to budgeting, casting, finding actors, directors, camera people, composers, and distributors. -It will also show you how to do ALL of that yourself, on almost any budget. -You'll learn about the gear you need like cameras, tripods, lighting, editing software, editing computer. -Story & Script, the logline, a spec pitch that went to pilot, Joseph Campbell and the Hero's Journey, John Truby and the Anatomy of

Story, the writing concepts of Syd Field, Christopher Vogler, Michael Hague, plus outlines, the screenplay, free and demo screenwriting software sources, adapting a book into a movie, music synchronization licenses. -Finding actors and crew members. Free casting tools. Paid casting services. -A look at cameras, including f/stop, t/stops, depth of field, focal lengths, distortions, filter, matte boxes, global and rolling shutters, and lens mounts. -How to budget and plan a production economically. -Business types for setting up your production company. How to protect your assets and a discussion of liabilities and taxes. -Copyrights and licensing information. -Making a storyboard and using it for shooting, editing, and composing. -The shoot itself, framing shots, the master shot, the close shots, reverse angles, the 180 rule, lighting a set with sample diagrams, night for day shots, day for night shots, doing coverage of a scene, the role of the script supervisor. -Special Effects, blue, green, and yellow screen, examples. -Editing 16 and 35mm movie film, analog videotape using an edit controller, digital file types, editing software, the timeline, dialog editing, background, music, and room tone tracks. -A primer for Composing Music, learning how to count to make chords and patterns, major chords, minor chords, sevenths, major sevenths, diminished, perfect seconds, including a template for a key wheel to help you change keys and know what notes makeup what chords. Concepts that the video person who is all thumbs can use to make their own basic backgrounds scores if they can't find a composer. -The new ASCAP and BMI Cue Sheets so you can get paid for any music when your productions air on broadcast or network television. Also covers the Harry Fox Agency for the licensing of your song, your music or to obtain permission to use someone else's tunes. -The history of imaging, optics, the photographic process, projectors, sound recording, tube electronics, television, audio recording, the how and why of film speeds, how color movie film works, how color television works, the differences between American and European film and video, the digital age, SD, HD, 4k and 8k. A look at the mystical color spaces of YUV and YIQ. -Distribution concepts for your films. -Los Angeles Union Scale Rates for the cast and crew so you can budget your scripts. -A Bibliography of reference sources for further reading. The author has been doing film, photography, and audio recording for fifty-five years working on productions that have aired on television, been screened theatrically and on YouTube. The author has been writing on the topics of film, video, and audio for magazine since 1980, including contributions for Mix Magazine, Music Connection, Pro Sound News, Technical Photography, Moving Image, etc. The author was schooled in television electronics by engineers at Admiral in Chicago, and in film/theater production at Valley College in Los Angeles, under Dr. Milton Timmons, Dr. Stern, Peter Parkin MFA from Pasadena Playhouse, Elliot Bliss at CBS Television Studios (now Todd-AO).

The Sound System Design Primer is an introduction to the many topics, technologies, and sub-disciplines that make up contemporary sound systems design. Written in clear, conversational language for those who do not have an engineering background, or who think more in language than in numbers, The Sound System Design Primer provides a solid foundation in this expanding discipline for students, early/mid-career system designers, creative and content designers seeking a better grasp on the technical side of things, and non-sound professionals who want or need to be able to speak intelligently with sound system designers.

This book brings together the latest research in the battle against autism. According to numerous news reports, the increase in special needs children has reached epidemic proportions. Autism is a complex developmental disability that typically appears during the first three years of life. The result of a neurological disorder that affects the functioning of the brain, autism and its associated behaviours have been estimated to occur in as many as 2 to 6 in 1,000 individuals. Autism is four times more prevalent in boys than girls and knows no racial, ethnic, or social boundaries. Autism is a spectrum disorder. The symptoms and characteristics of autism can present themselves in a wide variety of combinations, from mild to severe. Although autism is defined by a certain set of behaviours, children and adults can exhibit any combination of the behaviours in any degree of severity. People with autism process and respond to information in unique ways. In some cases, aggressive and/or self-injurious behaviour may be present.

This book discusses the latest findings towards ensuring people's safety, health, and welfare at work. It crosses different disciplines, such as work physiology, health informatics, workplace design, injury prevention, and occupational psychology. It presents new strategies for safety management, including accident prevention methods, such as performance testing and participatory ergonomics. The book, which is based on the AHFE 2016 International Conference on Safety Management and Human Factors, held on July 27-31, 2016, in Walt Disney World®, Florida, USA, provides readers, including decision makers in government and public authorities, with a timely snapshot of the state of the art in the field of safety, health and welfare management. It also addresses agencies such as OSHA and NIOSH as well as other professionals dealing with occupational safety and health.

Three brothers, who live on Texas ranch, meet sexy women who steal their hearts. Three romantic stories filled with intrigue, love and steamy sex that touches the lives of three confirmed bachelors.

(Reference). This easy-to-understand book is for everyone involved with church sound: sound people, worship teams, clergy and others. Whether you want to design a new system or get the most out of the one you have, this handy guide will help you let your message be heard! It covers everything you need to know about: design and layout of your sound system; choosing the right microphones; speaker setup and positioning; feedback trouble-shooting and control; mixers; and much more.

Throughout this report, King covers varying aspects of making and sharing videos—from best practices to video content creation, including the types of equipment, tools, and staff resources you'll need to start incorporating video into your library outreach and marketing.
