Textbook of Gastrointestinal Radiology remains your indispensable source for definitive, state-of-the-art guidance on all the latest and emerging GI and abdominal imaging technologies. Drs. Richard M. Gore and Marc S. Levine lead a team of world-renowned experts to provide unparalleled comprehensive coverage of all major abdominal disorders as well as the complete scope of abdominal imaging modalities, including the latest in MDCT, MRI, diffusion weighted and perfusion imaging, ultrasound, PET/CT, PET/MR, plain radiographs, MRCP, angiography, and barium studies. This edition is the perfect "go-to" reference for today's radiologist. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Characterize abdominal masses and adenopathy with the aid of diffusion-weighted MR imaging. See how gastrointestinal conditions present with more than 2,500 multi-modality, high-quality digital images that mirror the findings you're likely to encounter in practice. Make optimal use of the latest abdominal and gastrointestinal imaging techniques with new chapters on diffusion weighted MRI, perfusion MDCT and MRI, CT colonography, CT enterography and MR enterography—sophisticated cross-sectional imaging techniques that have dramatically improved the utility of CT and MR for detecting a host of pathologic conditions in the gastrointestinal tract. Expert guidance is right at your fingertips. Now optimized for use on mobile devices, this edition is perfect as an on-the-go resource for all abdominal imaging needs. Effectively apply MR and CT perfusion, diffusion weighted imaging, PET/CT and PET/MR in evaluating tumor response to therapy.

The 5th edition Laboratory Manual that accompanies Chemistry in Context is compiled and edited by Gail Steehler (Roanoke College). The experiments use microscale equipment (wellplates and Beral-type pipets) as well as common materials. Project-type and cooperative/collaborative laboratory experiments are included. Additional experiments are available on the Online Learning Center, as is the instructor's guide.

This much-needed resource comprehensively reviews the current status of research on nutrition in chronic diseases and developmental disorders of children and helps translate this research into clinical practice. It provides a wealth of information on the nutritional implications of diseases' states, how nutrition can affect brain development, learning child behavior and how to improve the health status of pediatric patients through nutritional measures. Assessment, prevention, and treatment are all covered. The chapters focus on biochemical and clinical abnormalities, techniques for evaluating nutrition including behavior, nutritional management, and follow-up procedures. Well-organized and user-friendly, the book will continue to be of great value to pediatricians, nutritionists, gastroenterologists, neurologists, family practitioners, and dietitians as well as students and residents in those fields. The Second Edition has been thoroughly updated and includes new chapters on botanicals, genetics and nutritional aspects of birth defects, vegetarianism, obesity/yeating disorders, autism, and attention deficit-hyperactivity disorder, among other topics. Also available from the author is a Self-Study Guide with multiple choice questions and a few case studies 35 CPE/CME credits are available until 2015. For more information contact Dr. Ekvall at ekvall@aol.com or shirley.ekvall@uc.edu or call 513-522-1403.

Winner of the 2015 James Beard Award for Best Beverage Book and the 2015 IACP Jane Grigson Award. A revolutionary approach to making better-looking, better-tasting drinks. In Dave Arnold's world, the shape of an ice cube, the sugars and acids in an apple, and the bubbles in a bottle of champagne are all ingredients to be measured, tested, and tweaked. With Liquid Intelligence, the creative force at work in Booker & Dax, New York City's high-tech bar, brings readers behind the counter and into the lab. There, Arnold and his collaborators investigate temperature, carbonation, sugar concentration, and acidity in search of ways to enhance classic cocktails and invent new ones that revolutionize your expectations about what a drink can look and taste like. Years of rigorous experimentation and study—botched attempts and inspired solutions—have yielded the recipes and techniques found in these pages. Featuring more than 120 recipes and nearly 450 color photographs, Liquid Intelligence begins with the simple—how ice forms and how to make crystal-clear cubes in your own freezer—and then progresses into advanced techniques like clarifying cloudy lime juice with enzymes, nitro-muddling fresh basil to prevent browning, and infusing vodka with coffee, orange, or peppercorns. Practical tips for preparing drinks by the pitcher, making homemade sodas, and building a specialized bar in your own home are exactly what drink enthusiasts need to know. For devotees seeking the cutting edge, chapters on liquid nitrogen, chitosan/gellan washing, and the applications of a centrifuge expand the boundaries of traditional cocktail craft. Arnold's book is the beginning of a new method of making drinks, a problem-solving approach grounded in attentive observation and creative techniques. Readers will learn how to extract the sweet flavor of peppers without the spice, why bottling certain drinks beforehand beats shaking them at the bar, and why quinine powder and succinic acid lead to the perfect gin and tonic. Liquid Intelligence is about satisfying your curiosity and refining your technique, from red-hot pokers to the elegance of an old-fashioned. Whether you're in search of astounding drinks or a one-of-a-kind journey into the next generation of cocktail making, Liquid Intelligence is the ultimate standard—one that no bartender or drink enthusiast should be without.

Business owner and investment banker Rod Robertson's success secrets are now yours. His Winning at Entrepreneurship: Insider's Tips on Building, Buying, and Selling Your Own Business holds original tips gleaned from scores of his small to medium-size business acquisitions. Case studies and personal interactions give key insights to: Raising cash Starting a business Buying a business Creating quick growth Avoiding the pitfalls Preparing to sell Enjoying the rewards of your labors Winning at Entrepreneurship will assist all in monetizing their dreams. The novice reader will discover a pragmatic guide for the road to riches. And those looking to start or buy a business or prepare their company for sale will find a roadmap to success.

Provides an introduction to the principles and procedures of chemistry, including atomic structure, the elements, compounds, the three states of matter, chemical reactions, and thermodynamics.

The activities focus on the process of doing science and cover physical science, earth and space science, and life science. Children learn the importance of establishing an experimental control, changing and controlling variables, observing, measuring, recording data, and drawing reasonable conclusions.
