The Geopolitics Of Cybersecurity Uploaded on 2020-02-10 in INTELLIGENCE-International, GOVERNMENT-National, FREE TO VIEW Nations stand on the precipice of a technological tidal wave in cyberspace that is fundamentally altering the modern world.

The Geopolitics Of Cybersecurity - Cyber Security Intelligence

Geopolitics The geopolitical landscape is in flux in the wake of COVID-19 and its cascading impacts; some major powers are pursuing greater isolation; and multilateralism is under attack. The immediate task is to strengthen alliances and make the case for global cooperation – climate safety our work depends on it.

Geopolitics, Diplomacy and Security - E3G

Geopolitics is traditionally the study of how political power is reinforced or undermined by geographical arrangements (boundaries, coalitions, spatial networks, natural resources, etc.). Geopolitics also denotes the practical decisions of political and social leaders with respect to geographical arrangements.

Written by a group of leading experts on Arctic affairs, this book offers a historically informed and comprehensive study of the geopolitics and security challenges of the Arctic. The key aim of the work is to identify the conditions for cooperation, stability and peace in the Arctic and to reach beyond simple description and expectation in order to explore in depth some of the main factors that will determine the future of international relations in the region. Furthermore, it addresses key topics such as the geopolitical significance of the Arctic and the importance of oil and gas resources in the Arctic. The book also investigates what the main characteristics of governance in the Arctic are, and how institutions and regimes can promote stability and security in the region. The volume maintains two layers of focus. The first relates to the dynamics within the Arctic and the second to developments outside the region, highlighting that we cannot understand the Arctic in isolation from global developments such as energy markets, security conflicts and NATO-Russian antagonism. This book will be of much interest to students of Arctic politics, security studies, geopolitics, Russian and Scandinavian politics, and international relations in general.

Against the backdrop of climate change and tectonic political shifts in world politics, this handbook provides an overview of the most crucial geopolitical and security related issues in the Arctic. It discusses established shareholder's policies in the Arctic – those of Russia, Canada, the USA, Denmark, and Norway – as well as the politics and interests of other significant or future stakeholders, including China and India. Furthermore, it explains the economic situation and the legal framework that governs the Arctic, and the claims that Arctic states have made in order to expand their territories and exclusive economic zones. While illustrating the collaborative approach, represented by institutions such as the Arctic council, which has often been described as an exceptional institution in this region, the contributing authors examine potential resource and power conflicts between Arctic nations, due to competing interests. The authors also address topics such as changing alliances between Arctic nations, new sea lines of communication, technological shifts, and eventually the return to power politics in the area. Written by experts on international security studies and the Arctic, as well as practitioners from government institutions and international organizations, the book provides an invaluable source of information for anyone interested in geopolitical shifts and security issues in the High North.

This volume focuses on the spotlight on Romania and Moldova, two distinct nations that share a common language, history and culture. Romania is a NATO member since 2004 and a fully integrated nation into the European Union since 2007, while The Republic of Moldova (a former Soviet republic) is attempting to join both international organizations for security and development reasons. Ever since the Iron Curtain fell on Europe at the end of World War II, the term “ Eastern Europe ” has been used without much regard for the diversity of the region. Given the geographical proximity, perhaps this is an understandable error. However, moving forward into the twenty-first century, and considering the highly sensitive geopolitical, security and development issues playing out in the region, we believe each nation should be treated with the unique distinction it deserves. Building a mosaic of the most current research, practical application, and policy, the authors, who represent unique, insider perspectives, cover a range of emerging and timely topics from Black Sea security to cultural analyses, organizational development and risk assessment shedding light on social, political and economic challenges of rapid transition in the region, while considering the implications for research, practice and policy in other front-line regions around the world.

The transformation from traditional war between nation-states to conflict between nation-states and nonstate actors requires decision makers, policy analysts, military commanders, intelligence officials, and legislators to answer the question: is there a strategy for an unwinnable conflict? This question takes on particular urgency given the extraordinary number of conflict points that define the current state of international relations. *Modern Geopolitics and Security: Strategies for Unwinnable Conflicts* draws on the author's extensive experience in counterterrorism, negotiation, and the implementation of the Oslo Peace Process with his more recent work in academia. The book uses an interdisciplinary case study model to illustrate valuable lessons learned and best practices in strategic analysis and decision making that are based on international relations, international law, and negotiation/intervention. The book defines sovereignty, intervention, geopolitics, security, and what they mean in a global landscape. It examines historical examples of global crises and security concerns as well as contemporary geopolitical issues, including the Israeli-Palestinian conflict, intervention in Libya, non-intervention in Syria, the Good Friday Agreement, the conflict in the former Yugoslavia, and the Arab Spring. We are entering a new era, where disaffected individuals who are willing and able to act, have more power and potential influence than ever before. Conflicts like those occurring in Egypt, Syria, Afghanistan, Iraq, Israel, and elsewhere are all complex organisms—nuanced as never before. Add in increasing regional asymmetrical conflicts, increasing global economic strain, social media and the accelerating speed of communication, ideological and regional state versus nonstate conflicts—such as in the case of al-Qaeda and other such movements—and traditional "business as usual" geopolitics is being somewhat turned on its head. *Modern Geopolitics and Security* addresses topics that aren't currently covered anywhere – establishing a new paradigm to rethink modern geopolitics, given new and emerging challenges to traditional schools of thought. View an article by Amos N. Guiora that recently appeared in the *The New York Times*..

This new Handbook gathers together state-of-the-art theoretical reflection and empirical research by a group of leading international scholars relating to recent transformations in the field of security studies.

This concise introduction to the growth and evolution of geopolitics as a discipline includes biographical

information on its leading historical and contemporary practitioners and detailed analysis of its literature. • Biographies of major current geopolitical scholars and descriptions and listings of their works • Maps of geopolitical crisis areas, such as Afghanistan/Pakistan, the South China Sea, and the Straits of Malacca • Quotations from various government and military primary source documents • A glossary of geopolitical terms • A bibliography of international scholarly resources, including government and military documents

Sicker focuses on the dominant position of the United States within the Western Hemisphere and the geopolitical and geostrategic factors that have helped shape its national security policies toward the region through its modern history. He also examines the problems of interstate relations within the hemisphere.

Throughout history, Central Asia has formed an important strategic link between the East and the West and been described as the ‘ great pivot ’ in the early-twentieth century. This book looks at the relations between the Central Asian states and major external powers. It shows how these nations have kept the fragile geopolitics of the region free of the so-called ‘ New Great Game ’ . The volume evaluates the roles of major powers such as Russia, United States, China, Iran, and Turkey, as well as India and its ‘ Silk Road Strategy ’ . It also compares the regional geopolitics of Central Asia with its neighbour Caucasus. The study indicates how, despite limited inter-state cooperation, the region has prevented conflicts and wars, due to which these states have been able to enjoy greater strategic autonomy in their dealings with other countries. The book will benefit scholars and researchers of international relations, political and strategic studies, area studies, and Central Asian studies apart from the interested general reader.
