Fans of Sarah J. Maas will love this story about when one of the four horseman comes to spread the plague, a young woman risks her life to save her town from him, only to fall in love with him.

The third horseman must choose between the young woman who once saved his life and his loyalty towards his last immortal brother.

As the second horsemen brings war and destruction, he meets a young woman who he believes is destined to be his wife, but unfortunately for him she does everything she can to sabotage his plans.

The Four Horsemen - War, Pestilence, Famine and Death - first appeared in the Book of Revelations a thousand years ago, but they continue to track us in our own time. This original and inspiring study by celebrated historian Emily Mayhew traces the advances in science, technology and humanitarianism that are enabling us to take them on, one by one. ‘The beauty of The Four Horsemen is how she takes her quaking readers to the edge of the abyss . . . I was left moved and uplifted . . . [A] first-class example of popular science’ The Times ‘[A] thoughtful and ultimately uplifting analysis of the unsung heroes of our age’ Independent
It begins in Mosul, our oldest surviving city, and the extraordinary coalition created in a matter of days to save its people from the worst horrors of the liberation battle against ISIS. As the city and the humanitarian operation that helped it to survive are restructured for a new age, Mayhew shows other people whose work gives us hope for the future, from the search to find new ways to discover and use antimicrobial medicines and the innovations in preventing the spread of deadly viruses; the laboratory work being taken to protect crops from disease and reduce famine, and why the potato, not the banana is the future; to the unique courage and resolution of those dedicated to securing the rights of the dead and their families. Standing in the way of the Horsemen is what Emily Mayhew calls, ‘the most extraordinary alliance ever to come together in defence of our humanity.’ These are the doctors, scientists, statisticians, engineers, peace negotiators, pharmacists, historians, forensic scientists, vaccinators and volunteers who are creating solutions to life and death problems which threaten us all. They are the new heroes of our age and this book is about them.

The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self.

Partly set in Argentina, partly in France this anti-German story describes the horrors of WW I as the background for a tragic story of illicit love.

A powerful polemic on the major threats facing the world today and how they can be overcome. Our world is facing catastrophes of many kinds, from the climate crisis to global outbreaks of deadly diseases. But could we look back at the collapse of previous civilisations to see what lessons might be learned? The explorer and campaigner Robin Hanbury-Tenison believes we urgently need to tackle the four harbingers of catastrophe: The White Horse of Pestilence and Pandemics — many remote tribal societies have lives that are healthier than ours — what can we learn from them? The Red Horse of War — can we avoid conflict through promoting prosperity and renewable energy for all? The Black Horse of Famine — is now the time to use technology we ’ ve had since World War II to influence the weather? The Pale Horse of Death — will geoengineering help to undo the appalling pollution we are inflicting on the planet, especially the oceans? The lessons of Taming The Four Horsemen are clear: if we humans are to survive we need to make transformative changes now.

Christopher Hitchens, described in the London Observer as “ one of the most prolific, as well as brilliant, journalists of our time ” takes on his biggest subject yet — the increasingly dangerous role of religion in the world. In the tradition of Bertrand Russell ’ s Why I Am Not a Christian and Sam Harris ’ s recent bestseller, The End Of Faith, Christopher Hitchens makes the ultimate case against religion. With a close and erudite reading of the major religious texts, he documents the ways in which religion is a man-made wish, a cause of dangerous sexual repression, and a distortion of our origins in the cosmos. With eloquent clarity, Hitchens frames the argument for a more secular life based on science and reason, in which hell is replaced by the Hubble Telescope ’ s awesome view of the universe, and Moses and the burning bush give way to the beauty and symmetry of the double helix.

There are worse things than death. Things that lurk in the shadows and slip into your dreams. Things that have no business existing. Things that once slept ... but have now awoken. For Callypsa Lillies, the fae magic that now runs through her veins is equal parts curse and good fortune. For the very thing that bonds her to Desmond Flynn, the King of the Night, also makes her vulnerable to the Thief of Souls, a man who wants to break the world ... and Callie along with it. But it’s not just the Thief whose shadow looms over the Otherworld. Des’s father is back from the dead, and he wants revenge on the son who sent him to the grave in the first place. Des and Callie must figure out how to stop both men, and time is running out. Because there are forces at play working to tear the lovers apart once and for all ... and unfortunately for them, death is no longer the worst thing to fear.

Praise for the first edition: "Aberth wears his very considerable and up-to-date scholarship lightly and his study of a series of complex and somber calamites is made remarkably vivid." -- Barrie Dobson, Honorary Professor of History, University of York
The later Middle Ages was a period of unparalleled chaos and misery -in the form of war, famine, plague, and death. At times it must have seemed like the end of the world was truly at hand. And yet, as John Aberth reveals in this lively work, late medieval Europeans’ cultural assumptions uniquely equipped them to face up positively to the huge problems that they faced. Relying on rich literary, historical and material sources, the book brings this period and its beliefs and attitudes vividly to life. Taking his themes from the Four Horsemen of the Apocalypse, John Aberth describes how the lives of ordinary people were transformed by a series of crises, including the Great Famine, the Black Death and the Hundred Years War. Yet he also shows how prayers, chronicles, poetry, and especially commemorative art reveal an optimistic people, whose belief in the apocalypse somehow gave them the ability to transcend the woes they faced on this earth. This second edition is brought fully up to date with recent scholarship, and the scope of the book is broadened to include many more examples from mainland Europe. The new edition features fully revised sections on famine, war, and plague, as well as a new epitaph. The book draws

some bold new conclusions and raises important questions, which will be fascinating reading for all students and general readers with an interest in medieval history.
